

10-TM-30000

Max. 30000 kg - 10 mm - 5Hz

TM-Mountings, type TM-30000, are used for the suspension of heavy machinery like generator-sets, pump-units and floating floor systems (Two Mass Systems). These mountings are produced in a variety of rubber mixes. For the selection of these mountings we advise you to consult our engineers.

Applications: total-energy-units, diesel-generatorsets, pumpunits, cooling equipment, floating floor systems etc.
