

ELASTIC CEILING HANGERS

Buildings

- Proven rate of impact noise reduction of 31 dB
- Bearing types for wood, steel and concrete steps
- Rapid installation due to flexible design
- Targeted load transmission
- Minimal settlement behaviour

1. Stair base brackets made of Sylomer® are used on lightweight stairs to prevent the noise of people going up and down being transferred to adjoining apartments and causing noise nuisance.
2. The Getzner SB10 bearing for stairs is suitable both for use in precast
3. and in-situ concrete stairs.
